I'm glad the police have decided to investigate this incident at a Trans Pride Event, having initially closed it with no further action.

I'm sure the police will consider the evidence carefully.

The words “*punch a terf in the face*” rang out around Trafalgar Square like a ricochet of increasing intensity at Trans Pride London last Saturday. You hear the crowd cheer in the video filmed by Dazed Magazine but that quickly gets filtered through the noise of tutting from people who have other ideas of how protest should be managed. “*Today is about love and rage,*” trans activist and model Munroe Bergdorf said, but many were angered by the attention Baker was able to take away from the more considered elements of the event.

The term TERF historically has been used as an accurate descriptor for

feminists who reject “gender ideology”. Whilst there has been a movement to label it as a slur or derogatory, there is no linguistic or academic consensus on the word being such. It is also worth noting that many accounts, including prominent gender critical voices, embrace the term and label themselves as such.

What are TERFs?

The argument that TERF is a gendered word is categorically false. Whilst there is no doubt that the word’s definition has loosened over time, one of those large changes is that fact it is also used to describe a large proportion of gender critical men, so arguments of misogyny and targeted harassment of women is demonstrably untrue.

It is worth noting that Posie Parker herself has incited violence many times.

From saying that women who oppose her will be annihilated and calling for men to arm themselves with guns to monitor bathrooms. Both of which are very clear threats and incitements of violence, yet the same people who are calling for Baker to be punished routinely ignore that.

The people who invited Baker to the stage and gave her the mic knew what they were doing. She didn't gate-crash that moment, it was a gate opened wide for her, rightly or wrongly by people who know full-well she has a history of outspoken, often sassy oratory. She can only speak of her direct experience and only from the heart because, unlike other speakers does not prepare for a specific audience or pander to any preordained remit.

The language of the oppressed is often violent in tone. Even the popular phrase ‘smash the patriarchy’ could be read as incitement of violence against men with an unkind interpretation. Some lesbian iconography centres the labrys, a two headed axe. Again this could be perceived as threatening with an unkind interpretation.

Calls for Baker's arrest on twitter are coming from those who already demonise trans people. They are morally selective in their need for justice, they simply want her silenced because her words cut through the noise.
